- 14.40** SESSION 5: Asian Fintech Movements
- 15.05** ROUND UP: Impact Startup Award 2017 ceremony
- 15.15** Drinks, snacks & network

SUMMARY OF SESSIONS

SESSION 1: FUTURE OF BANKING

The fintech ecosystem is constantly changing and it is changing at an increasing speed. What is the future of banking? Who will rule? Traditional banks, BigTech or FinTech? How will Open Banking and PSD2 affect the current environment? Are we moving from a product vs. product industry towards an ecosystem vs. ecosystem industry? How can we – in Denmark and the Nordics – increase our influence on a global scale, and what is our value proposition? These are some of the questions we will seek to shed light upon in session 1.

Keynote Speaker: Ewan MacLeod (Nordea)

Panelists: Ewan MacLeod (Nordea), Lasse Meholm (DNB), Varun Mittal (EY), Simon Haldrup (MobileLife), Thomas Bering (Google)

SESSION 2: CORPORATE STARTUP COLLABORATION

Innovation is the key to success in the financial sector of tomorrow. To achieve high levels of innovation two very different worlds need to come together: fintech startups and the finance corporates.

On one hand fintech startups have the entrepreneurial drive and the passion to change the world with new technology. But they lack reputation, access to clients and the resources to deal with complex regulation. Financial corporates have resources, knowledge and distribution channels, but their history and corporate DNA makes it hard for them to cope with radical innovations.

On the face of it the solution is easy: Startups and Corporates need to collaborate to make new fintech innovations fly. But in reality, is it really that straightforward? How do we cope with reality and make the needed collaboration happen?

1st keynote Speaker: Nektarios Liolios (Startupbootcamp)

2nd keynote Speaker: Dea Markova (Innovate Finance)

Panelists: Nektarios Liolios (Startupbootcamp), Ole Madsen (Spar Nord), Klavs Hjort (Danske Bank), Mark Højgaard (Coinify), Morten Dahlgaard (AAU)

SESSION 3: FUTURE OF REGULATIONS & PSD2

The Danish FSA launched their FT Lab initiative which includes, among other things, a regulatory sandbox. Denmark isn't the only country having a discussion in terms of this though. So, what do we really mean when talking about sandboxes? How are they useful and how can we optimize them? The FSA's need to find a balance between maintaining stability and making space for fintech innovations. Another important issue is whether the FSA's are thinking globally or nationally in terms of sandboxes.

We will look into how far the different regulatory bodies in the Nordics should and could go to support fintech innovations and explore how other regulatory bodies work with sandboxes.

Keynote Speaker: Thomas Brenøe (Danish FSA)

Panelists: Thomas Brenøe (Danish FSA), Stig Johansson (Swedish FSA), Hanna Heiskanen (Finnish FSA), Ken Villum Klausen (Lunar Way), Hans Christian Bjørne (The Factory)

SESSION 4: SUSTAINABILITY IN FINANCE

Emerging fintech solutions promise to redefine everyday banking. It is argued that fintech solutions can provide banking services to two billion "unbanked" adults and contribute to the eradication of extreme poverty by 2030. But can fintech also save the planet? There are now a growing number of sustainable applications within fintech: tokenization of renewable energy on blockchain, sustainable pensions, sustainability provenance, and disaster forecasting and relief coordination. At this session, we will discuss the opportunities for fintech solutions within sustainability and how fintech solutions can provide a solution for environmental problems and become a significant contributor to making a better and more sustainable world.

1st keynote Speaker: Kirsten Brosbøl (The Danish Parliament)

2nd keynote Speaker: Cecilia Repinski (Stockholm Green Digital Finance)

Panelists: Kirsten Brosbøl (The Danish Parliament), Cecilia Repinski (Stockholm Green Digital Finance), Deanna MacDonald (BLOC), Lars Christian Ohnemus (CBS)

SESSION 5: ASIAN FINTECH MOVEMENTS

Asia received a total of US\$14.8bn in fintech investments last year. When it comes to the adopting the newest, digital methods for managing their personal finances, Chinese and Indian consumers are way ahead of the rest of the world, and Singapore continues to position itself as a clear leader in the Asian region. In this session we will look into why Asia such a hot topic. The ambition and possibilities in Singapore are significant. But how is it worthwhile looking into the Asian market as a European startup? We will get into the biggest market opportunities in Singapore and Asia, including market maturity, bank collaboration, regulatory environment and much more. Asia is a very large continent, which is why you cannot simply generalize in terms of how to enter an Asian market.

Keynote Speaker: Varun Mittal (EY)

AWARDS & NOMINEES

Copenhagen FinTech every year hands out awards celebrate the innovative initiatives within the overall Danish fintech ecosystem. This year we will hand out two awards: one for the best innovative initiative and another for the best impact startup within the 17 UN Global Goals. So, who will conquer the awards of this year?

COPENHAGEN FINTECH INNOVATION AWARD 2017

The independent highly qualified judging panel is looking for the most innovative action within the overall Danish fintech ecosystem. This can be a new fintech solution, product or service within existing fintech companies – but it can also be new partnerships, platforms or creative actions taken by individual organization or different organizations in collaborations.

The Copenhagen FinTech Innovation Award 2017 is published in collaborations with Signicat. Signicat is a Digital Identity Service Provider (DISP) and is dedicated to innovate in the areas of electronic identity and signatures, and to offer customers solutions that enable them to offer their products and services in new and innovative ways.

COPENHAGEN FINTECH IMPACT STARTUP AWARD 2017

At Copenhagen FinTech we believe that new innovative fintech solutions can become a significant contribution to creating a better and more sustainable world. This year we therefor want to honor a fintech startup which product & mission with the best possibilities to change the world according to the 17 UN global goals from 2015.

The Copenhagen FinTech Impact Startup Award 2017 is published in collaborations with Danske Bank. A Nordic universal bank with strong local roots and bridges to the rest of the world. For more than 145 years, they have helped people and businesses in the Nordics realize their ambitions. Danske Bank have been working to reduce their negative impact on the environment for many years.
